OBJECTIVE

Seeking a software developer position that enables me to contribute to the organization by utilizing my strong academic and analytical skills in a web development environment. Proficient in React, jQuery, JavaScript/ECMAScript(ES6), and mobile-first responsive development with HTML5 and CSS3. Experienced with modern tooling and excited to pick up the right tools for the job. Have worked with many frontend and backend technologies and familiar with building and implementing Node servers and working with NoSQL databases to integrate with the front end.

SKILLS

- **Language:** JavaScript/ES6(ECMAScript), HTML5, CSS3/LESS/SASS, Ruby, Node.js
- **Framework/Library:** Ruby on Rails, React/Redux, jQueryUI, jQuery, Bootstrap
- **Data/Auth:** AJAX, MySQL, SQL, PostgreSQL, SQLite
- **Toolkits:** Git, GitHub, npm/yarn, webpack, RESTAPIs, GoogleAPI, GoogleMapsAPI, Mapbox APIs, AlgoliaSearch, SinglePageApplications, ResponsiveMobile-First Design, Figma, Sublime text, Trello, Mocha, Chai, Jest, Enzyme, Travis CI, Heroku, Netlify, Cloudinary, PWA

EXPERIENCE

Freelance Web Developer

New York City

Apr 2020 — Present

- Meeting with individuals to review website ideas and gather information regarding what tasks needed to be implemented.
- Designed and developed new features for projects using Ruby, CSS, HTML, JavaScript, jQuery.
- Built custom websites using Bootstrap and helped maintain back-end functionality..
- Developed UI/UX strategies that included wireframes and mockups.

PROJECTS

RatedPlaces

- Allows users to access recommendations & deals rated by the community their part of.
- Users can access special discounts only available to them.
- An PWA using Ruby on Rails, HTML, CSS, JavaScript, Ajax and ActiveRecord on Github/Heroku.
- Demo: <http://ratedplaces.herokuapp.com/> (**Email:** user@gmail.com, **Password:** password; better UX on an mobile device)

WhatTheArt

- WhatTheArt is a art sharing marketplace where user can rent any art they want, wherever they want it, from a vibrant community of local hosts.
- Users can easily access the availability and price of the art from the homepage and share the link with others.
- Designed and implemented Node server and created a database schema that was then integrated and used by the front end.
- AirBnB-style platform for renting Art using Figma, HTML, CSS, JavaScript, Ruby on Rails and Heroku.
- Demo: <http://what-the-art.herokuapp.com/home> (**Email:** *user@gmail.com*, **Password:** *password*)

Mister Cocktail

- A simple rails application for storing and viewing cocktail recipes.
- The aim of this project was an exercise in schema design and rails web development.
- The project also incorporates image hosting on Cloudinary image service.
- Demo: <https://frozen-sierra-76224.herokuapp.com/>
